CHEMICALS AND INDUSTRIAL PROCESSES ASSOCIATED WITH CANCER IN HUMANS

IARC MONOGRAPHHS, Volumes 1 to 20

Report of an IARC ad hoc Working Group which met in Lyon, 15-17 January 1979 to advise the Director, IARC, on chemicals carcinogenic for humans

Prepared by:

RALPH ALTHOUSE
LORENZO TOMATIS

JAMES HUFF
JULIAN WILBOURN

September 1979
In 1971, the International Agency for Research on Cancer (IARC) initiated a programme on the evaluation of the carcinogenic risk of chemicals to humans involving the production of critically evaluated monographs on individual chemicals.

The objective of the programme is to elaborate and publish in the form of monographs critical reviews of data on carcinogenicity for groups of chemicals to which humans are known to be exposed, to evaluate these data in terms of human risk with the help of international working groups of experts in chemical carcinogenesis and related fields, and to indicate where additional research efforts are needed.
