NOTE TO THE READER	1
LIST OF PARTICIPANTS	3
PREAMBLE	9
A. GENERAL PRINCIPLES AND PROCEDURES	9
1. Background.....	9
2. Objective and scope.....	10
3. Selection of agents for review	11
4. Data for the <i>Monographs</i>	12
5. Meeting participants	12
B. SCIENTIFIC REVIEW AND EVALUATION	14
1. Exposure data.....	15
2. Studies of cancer in humans.....	16
3. Studies of cancer in experimental animals.....	20
4. Mechanistic and other relevant data.....	23
5. Summary	26
6. Evaluation and rationale.....	27
References.....	31
1. EXPOSURE DATA	33
1.1 Identification of the agents	33
1.1.1 Red meat.....	33
1.1.2 Offal	33
1.1.3 Processed meat	33
1.2 Meat composition.....	35
1.2.1 Red meat.....	35
1.2.2 Processed meat	40
1.2.3 Changes in meat composition due to cooking methods	43

1.3	Exposure via food intake	50
1.3.1	Data description	50
1.3.2	Results	51
1.4	Exposure assessment and biological markers	79
1.4.1	Questionnaires	79
1.4.2	Biological markers	86
1.5	Regulations and guidelines	88
1.5.1	Prevention of infectious disease	89
1.5.2	Prevention of contamination	89
	References	90

2. CANCER IN HUMANS..... 103

2.1	General issues regarding the epidemiology of cancer and consumption of red meat and processed meat	103
2.1.1	Exposure definition	103
2.1.2	Sample size and the number of exposed cases	104
2.1.3	Study design	104
2.1.4	Exposure assessment tools	104
2.1.5	Adjustment for potential confounding factors	104
	References	105

2.2	Cancer of the colorectum	107
2.2.1	Cohort studies	107
2.2.2	Case-control studies	121
2.2.3	Meta-analyses	138
	References	235

2.3	Cancer of the stomach	245
2.3.1	Cohort studies	245
2.3.2	Case-control studies	247
2.3.3	Meta-analyses	248
	References	274

2.4	Cancer of the pancreas	277
2.4.1	Cohort studies	277
2.4.2	Case-control studies	280
2.4.3	Meta-analyses	284
	References	297

2.5	Cancer of the prostate	299
2.5.1	Cohort studies	299
2.5.2	Case-control studies	300
	References	312

2.6	Cancer of the breast	315
2.6.1	Cohort studies	315
2.6.2	Case-control studies	322
	References	332
2.7	Cancer of the lung	339
2.7.1	Cohort studies	339
2.7.2	Case-control studies	340
2.7.3	Meta-analyses	343
	References	344
2.8	Cancer of the oesophagus	347
2.8.1	Cohort studies	347
2.8.2	Case-control studies	348
2.8.3	Meta-analyses	349
	References	349
2.9	Other cancers	353
2.9.1	Non-Hodgkin lymphoma	353
2.9.2	Cancer of the liver (hepatocellular carcinoma)	360
2.9.3	Cancers of the gallbladder and biliary tract	362
2.9.4	Cancer of the testis	363
2.9.5	Cancer of the kidney	363
2.9.6	Cancer of the bladder	367
2.9.7	Cancer of the ovary	372
2.9.8	Cancer of the endometrium	375
2.9.9	Leukaemia	377
2.9.10	Cancer of the brain	379
2.9.11	Cancer of the breast in men	380
	References	380
3.	CANCER IN EXPERIMENTAL ANIMALS	385
3.1	Mouse	385
3.1.1	Red meat	385
3.1.2	Red meat with known carcinogens	388
3.2	Rat	388
3.2.1	Red meat	388
3.2.2	Red meat with known carcinogens	403
3.2.3	Red meat and/or processed meat with known carcinogens to give aberrant crypt foci and/or mucin-depleted foci	407
3.3	Haem iron	412
3.4	Overview of cancer bioassays for chemicals related to meat consumption	412
3.4.1	Heterocyclic aromatic amines	412
3.4.2	Polycyclic aromatic hydrocarbons	416
3.4.3	<i>N</i> -Nitroso compounds	417
3.4.4	Others	418
	References	418

4. MECHANISTIC AND OTHER RELEVANT DATA	423
4.1 Digestion and metabolism	423
4.2 Mechanisms of carcinogenesis	424
4.2.1 Genetic and related effects	424
4.2.2 Oxidative stress	436
4.2.3 Alteration of cell proliferation and cell death	438
4.2.4 Other mechanisms of carcinogenesis	439
4.2.5 Other relevant data and potential indirect mediators	441
4.2.6 Studies of hemin and hemin chloride	441
4.3 Precancerous lesions	442
4.3.1 Precancerous colorectal lesions	442
4.3.2 Other precancerous lesions in exposed humans	447
4.4 Cancer susceptibility	447
4.4.1 Genetic polymorphisms	447
4.4.2 Microflora	450
4.5 Meat components potentially involved in carcinogenesis	451
4.5.1 Haem iron	451
4.5.2 Lipid oxidation products	454
4.5.3 Heterocyclic aromatic amines	457
4.5.4 Polycyclic aromatic hydrocarbons	460
4.5.5 N-Nitroso compounds	462
4.5.6 Interactions between NOCs, haem iron, and HAAs	466
4.5.7 Other components	467
References	468
5. SUMMARY OF DATA REPORTED	487
5.1 Exposure data	487
5.2 Human carcinogenicity data	488
5.2.1 Cancer of the colorectum	488
5.2.2 Cancer of the stomach	490
5.2.3 Cancer of the pancreas	490
5.2.4 Cancer of the prostate	490
5.2.5 Cancer of the breast	491
5.2.6 Cancer of the lung	492
5.2.7 Cancer of the oesophagus	492
5.2.8 Other cancers	492
5.3 Animal carcinogenicity data	492
5.4 Mechanistic and other relevant data	493
6. EVALUATION	497
6.1 Cancer in humans	497
6.2 Cancer in experimental animals	497
6.3 Overall evaluation	497
6.4 Rationale	497
LIST OF ABBREVIATIONS	499

NOTE TO THE READER

The term ‘carcinogenic risk’ in the *IARC Monographs* series is taken to mean that an agent is capable of causing cancer. The *Monographs* evaluate cancer hazards, despite the historical presence of the word ‘risks’ in the title.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a *Monograph* does not mean that it is not carcinogenic. Similarly, identification of cancer sites with *sufficient evidence* or *limited evidence* in humans should not be viewed as precluding the possibility that an agent may cause cancer at other sites.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Section of IARC Monographs, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the *Monographs* as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Section of IARC Monographs, so that corrections can be reported in future volumes.
