NOTE TO THE READER.....	1
LIST OF PARTICIPANTS.....	3
PREAMBLE.....	7
A. GENERAL PRINCIPLES AND PROCEDURES	7
1. Background.....	7
2. Objective and scope.....	8
3. Selection of agents for review	9
4. Data for the <i>Monographs</i>	9
5. Meeting participants	10
6. Working procedures.....	11
B. SCIENTIFIC REVIEW AND EVALUATION	12
1. Exposure data.....	13
2. Studies of cancer in humans.....	14
3. Studies of cancer in experimental animals.....	18
4. Mechanistic and other relevant data.....	21
5. Summary	24
6. Evaluation and rationale.....	25
References.....	29
GENERAL REMARKS	31
TRICHLOROETHYLENE.....	35
1. Exposure Data.....	35
1.1 Identification of the agent	35
1.2 Production and use.....	37
1.3 Occurrence and exposure.....	40
1.4 Regulations and guidelines	48
2. Cancer in Humans	48
2.1 Introduction	48
2.2 Cohort studies	49
2.3 Case-control studies	72
2.4 Ecological studies.....	92
2.5 Meta-analyses and pooled analyses	95

3. Cancer in Experimental Animals	97
3.1 Mouse	98
3.2 Rat	112
3.3 Hamster	117
3.4 Administration with known carcinogens or other modifying factors	117
3.5 Effects of stabilizers	118
3.6 Carcinogenicity of metabolites	118
4. Mechanistic and Other Relevant Data	119
4.1 Toxicokinetic data	119
4.2 Genotoxicity and related effects	127
4.3 Non-genotoxic mechanisms of carcinogenesis	149
4.4 Susceptibility data	164
4.5 Other adverse effects	169
5. Summary of Data Reported	184
5.1 Exposure data	184
5.2 Human carcinogenicity data	184
5.3 Animal carcinogenicity data	186
5.4 Mechanistic and other relevant data	187
6. Evaluation	189
6.1 Cancer in humans	189
6.2 Cancer in experimental animals	189
6.3 Overall evaluation	189
6.4 Rationale	189
References	189

TETRACHLOROETHYLENE.....	219
1. Exposure Data	219
1.1 Identification of the agent	219
1.2 Production and use	220
1.3 Occurrence and exposure	222
1.4 Regulations and guidelines	234
2. Cancer in Humans	234
2.1 Cohort studies	238
2.2 Case-control studies	249
2.3 Ecological studies	271
2.4 Meta-analyses	272
3. Cancer in Experimental Animals	272
3.1 Mouse	272
3.2 Rat	277
3.3 Studies with mixtures of solvents	279
3.4 Initiation-promotion studies	279
3.5 Carcinogenicity of metabolites	279

4. Mechanistic and Other Relevant Data	280
4.1 Toxicokinetic data	280
4.2 Genotoxicity and related effects	292
4.3 Non-genotoxic effects and organ toxicity	301
4.4 Susceptibility	320
4.5 Mechanistic considerations	322
5. Summary of Data Reported	325
5.1 Exposure data	325
5.2 Human carcinogenicity data	326
5.3 Animal carcinogenicity data	327
5.4 Mechanistic and other relevant data	328
6. Evaluation	329
6.1 Cancer in humans	329
6.2 Cancer in experimental animals	329
6.3 Overall evaluation	329
References	329
DICHLOROACETIC ACID	353
1. Exposure Data	353
1.1 Identification of the agent	353
1.2 Production and use	355
1.3 Occurrence and exposure	355
1.4 Regulations and guidelines	357
2. Cancer in Humans	357
3. Cancer in Experimental Animals	357
3.1 Mouse	357
3.2 Rat	365
3.3 Co-administration with known carcinogens or other modifying factors	366
4. Mechanistic and Other Relevant Data	368
4.1 Absorption, distribution, metabolism, and excretion	368
4.2 Genotoxicity and related effects	368
4.3 Non-genotoxic mechanisms of carcinogenesis	375
4.4 Susceptibility data	381
4.5 Mechanistic considerations	383
5. Summary of Data Reported	385
5.1 Exposure data	385
5.2 Human carcinogenicity data	385
5.3 Animal carcinogenicity data	385
5.4 Mechanistic and other relevant data	385
6. Evaluation	386
6.1 Cancer in humans	386
6.2 Cancer in experimental animals	386
6.3 Overall evaluation	386
References	386

TRICHLOROACETIC ACID	393
1. Exposure Data	393
1.1 Chemical and physical data	393
1.2 Production and use	394
1.3 Occurrence	396
1.4 Regulations and guidelines	401
2. Cancer in Humans	401
3. Cancer in Experimental Animals	401
3.1 Mouse	402
3.2 Rat	406
3.3 Administration with known carcinogens or other modifying factors	406
4. Mechanistic and Other Relevant Data	407
4.1 Absorption, distribution, metabolism, and excretion	407
4.2 Genotoxicity and related effects	413
4.3 Nongenotoxic mechanisms of carcinogenesis	416
4.4 Susceptibility data	426
4.5 Mechanistic considerations	428
5. Summary of Data Reported	429
5.1 Exposure data	429
5.2 Human carcinogenicity data	429
5.3 Animal carcinogenicity data	429
5.4 Mechanistic and other relevant data	429
6. Evaluation	430
6.1 Cancer in humans	430
6.2 Cancer in experimental animals	430
6.3 Overall evaluation	430
References	430
CHLORAL AND CHLORAL HYDRATE	439
1. Exposure Data	439
1.1 Chemical and physical data	439
1.2 Production and use	441
1.3 Occurrence and exposure	442
1.4 Regulations and guidelines	443
2. Cancer in Humans	443
3. Cancer in Experimental Animals	444
3.1 Mouse	444
3.2 Rat	448
4. Mechanistic and Other Relevant Data	448
4.1 Toxicokinetic data	448
4.2 Genotoxicity and related effects	452
4.3 Non-genotoxic mechanisms of carcinogenesis	462

4.4	Susceptibility data	463
4.5	Toxic non-cancer effects	464
4.6	Synthesis of mechanistic considerations	465
5.	Summary of Data Reported	466
5.1	Exposure data	466
5.2	Human carcinogenicity data	466
5.3	Animal carcinogenicity data	466
5.4	Mechanistic and other relevant data	467
6.	Evaluation	467
6.1	Cancer in humans	467
6.2	Cancer in experimental animals	467
6.3	Overall evaluation	467
6.4	Rationale	468

LIST OF ABBREVIATIONS	513

NOTE TO THE READER

The term ‘carcinogenic risk’ in the *IARC Monographs* series is taken to mean that an agent is capable of causing cancer. The *Monographs* evaluate cancer hazards, despite the historical presence of the word ‘risks’ in the title.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a *Monograph* does not mean that it is not carcinogenic. Similarly, identification of cancer sites with *sufficient evidence* or *limited evidence* in humans should not be viewed as precluding the possibility that an agent may cause cancer at other sites.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Section of IARC Monographs, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the *Monographs* as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Section of IARC Monographs, so that corrections can be reported in future volumes.
