

## SUMMARY OF FINAL EVALUATIONS

Agent	Degree of evidence for carcinogenicity		Overall evaluation
	Humans	Animals	
Petroleum solvents	Inadequate		3
High-boiling aromatic solvents		Inadequate	
Special boiling-range solvents		No data	
White spirits		No data	
Toluene	Inadequate	Inadequate	3
Xylene	Inadequate	Inadequate	3
Cyclohexanone	No data	Inadequate	3
Dimethylformamide	Limited	Inadequate	2B
Morpholine	No data	Inadequate	3
1,2-Epoxybutane	No data	Limited	3
Bis(2,3-epoxycyclopentyl)ether	No data	Limited	3
Glycidyl ethers			
Phenyl glycidyl ether	No data	Sufficient	2B
Bisphenol A diglycidyl ether	No data	Limited	3
Phenol	Inadequate	Inadequate	3
Antimony trioxide	Inadequate	Sufficient	2B
Antimony trisulfide	Inadequate	Limited	3
Titanium dioxide	Inadequate	Limited	3
Paint manufacture and painting (occupational exposures in)			
Painter (occupational exposure as a)	Sufficient		1
Paint manufacture (occupational exposure in)	Inadequate		3
