

## SUMMARY OF FINAL EVALUATIONS

Agent	Evidence for carcinogenicity		Overall evaluation
	Humans	Animals	
Ampicillin	Inadequate	Limited	Not classifiable (3)
Azacitidine	No data	Sufficient	Probably carcinogenic (2A)
Chloramphenicol	Limited	Inadequate	Probably carcinogenic (2A)
Chlorozotocin	No data	Sufficient	Probably carcinogenic (2A)
Ciclosporin	Sufficient	Limited	Carcinogenic (1)
Cimetidine	Inadequate	Inadequate	Not classifiable (3)
Dantron (Chrysazin; 1,8-Dihydroxy-anthraquinone)	No data	Sufficient	Possibly carcinogenic (2B)
Furosemide (Frusemide)	Inadequate	Inadequate	Not classifiable (3)
Hydrochlorothiazide	Inadequate	Inadequate	Not classifiable (3)
Nitrofurural (Nitrofurazone)	Inadequate	Limited	Not classifiable (3)
Nitrofurantoin	Inadequate	Limited	Not classifiable (3)
Paracetamol (Acetaminophen)	Inadequate	Limited	Not classifiable (3)
Prednimustine	No data	Inadequate	Not classifiable (3)
Thiotepa	Sufficient	Sufficient	Carcinogenic (1)
Trichlormethine (Trimustine hydrochloride)	No data	Sufficient	Possibly carcinogenic (2B)
