

## SUMMARY OF FINAL EVALUATIONS

Agent	Degree of evidence of carcinogenicity		Overall evaluation of carcinogenicity to humans
	Human	Animal	
Ethylene	I	I	3
Ethylene oxide	L	S	1 <sup>b</sup>
Propylene	I	I	3
Propylene oxide	I	S	2B
Isoprene	I <sup>a</sup>	S	2B
Styrene	I	L	2B <sup>b</sup>
Styrene-7,8-oxide	I <sup>a</sup>	S	2A <sup>b</sup>
4-Vinylcyclohexene	I <sup>a</sup>	S	2B
4-Vinylcyclohexene diepoxide	I <sup>a</sup>	S	2B
Vinyl toluene	I <sup>a</sup>	ESL	3
Acrylamide	I	S	2A <sup>b</sup>
N-Methylolacrylamide	I <sup>a</sup>	L	3
Methyl methacrylate	I	ESL	3
2-Ethylhexyl acrylate	I <sup>a</sup>	L	3

S, sufficient evidence; L, limited evidence; I, inadequate evidence; ESL, evidence suggesting lack of carcinogenicity; for definitions of categories and groups, see preamble, pp. 27-30

<sup>a</sup>No data available

<sup>b</sup>Other relevant data taken into account in making the overall evaluation
